The above rejections are respectfully traversed.

Regarding the rejection of claims 1 and 5 under U.S.C. 102(b) as being anticipated by anticipated by Takahashi et al., Applicant submits that Takahashi et al. does not disclose at least “maintaining a current equipment mode of the universal remote control when the stored information on the input buttons is not the information on the input buttons related to the selection of the external inputs into the display apparatus”, as recited in claim 1. Regarding the rejection of claims 2-4 under 35 U.S.C. 103(a) as being unpatentable over Takahashi et al. in view of Tetsuya, Applicant respectfully submits that the references, taken alone or in combination, do not teach or suggest “maintaining a current equipment mode of the universal remote control when the stored information on the input buttons is not the information on the input buttons related to the selection of the external inputs into the display apparatus”, as recited

AMENDMENT UNDER 37 C.F.R. § 1.114(c)
